

APSAT 2026

Asia Pacific Satellite International Conference

Fairmont Hotel, Jakarta – Indonesia
May 12th – 13th, 2026

The **APSAT 2026** marks the 22nd edition of ASSI's annual international conference series dedicated to satellite communications and space-based technologies. Recognized and endorsed by leading international telecommunication societies, professionals, and government institutions, APSAT has evolved into Indonesia's foremost satellite technology forum. For more than two decades, APSAT has convened global leaders, entrepreneurs, policymakers, engineers, academics, and end-users to shape the trajectory of satellite development across Indonesia and the Asia-Pacific region. In 2026, APSAT carries even greater significance as Indonesia commemorates the 50th anniversary of its satellite journey, a legacy that began with the historic launch of Palapa A1 on 8 July 1976. This milestone symbolizes not only technological achievement but also Indonesia's early vision of connectivity sovereignty across its vast archipelago.

APSAT will discover :

Satellite Executive Roundtable : Regional Satellite Business Perspective

Satellite Executive Roundtable : Indonesia Satellite Business Perspective

Satellite & Launcher Technology Innovation : Space Industries Innovation

Ground and Network Innovation : AI, Integration and Inter-Operability

Future Ready Satellite Ecosystems: In AI And Sovereignty Era: AI and Sovereignty In/For Satellite Ecosystems

Satellite Application Trend Executive Roundtable : Emerging Player with Emerging Technology or Application

Ecosystem Roundtable : Multi Sector Industries Expectation Towards Future Satellite Ecosystems

Indonesia Aerospace Hakathon
